n Summary

Art Unit: 1765

15. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-28, drawn to a method for cmp polishing a semiconductor substrate,
 classified in class 438, subclass 595 (+).

II. Claims 29-30, drawn to a cmp polishing composition, classified in class 252, subclass 79.1 (+).

Inventions II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process such as one in which a conductive material is cmp polished.

Because the inventions are distinct for the reasons given above, and the different inventions have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventor ship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventor ship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Art Unit: 1765

A telephone call was made to attorney Mel Quintos on 10-22-99' to request an oral election to the above restriction requirement, but did not result in an election being made.
